MILSATCOM USA 2024

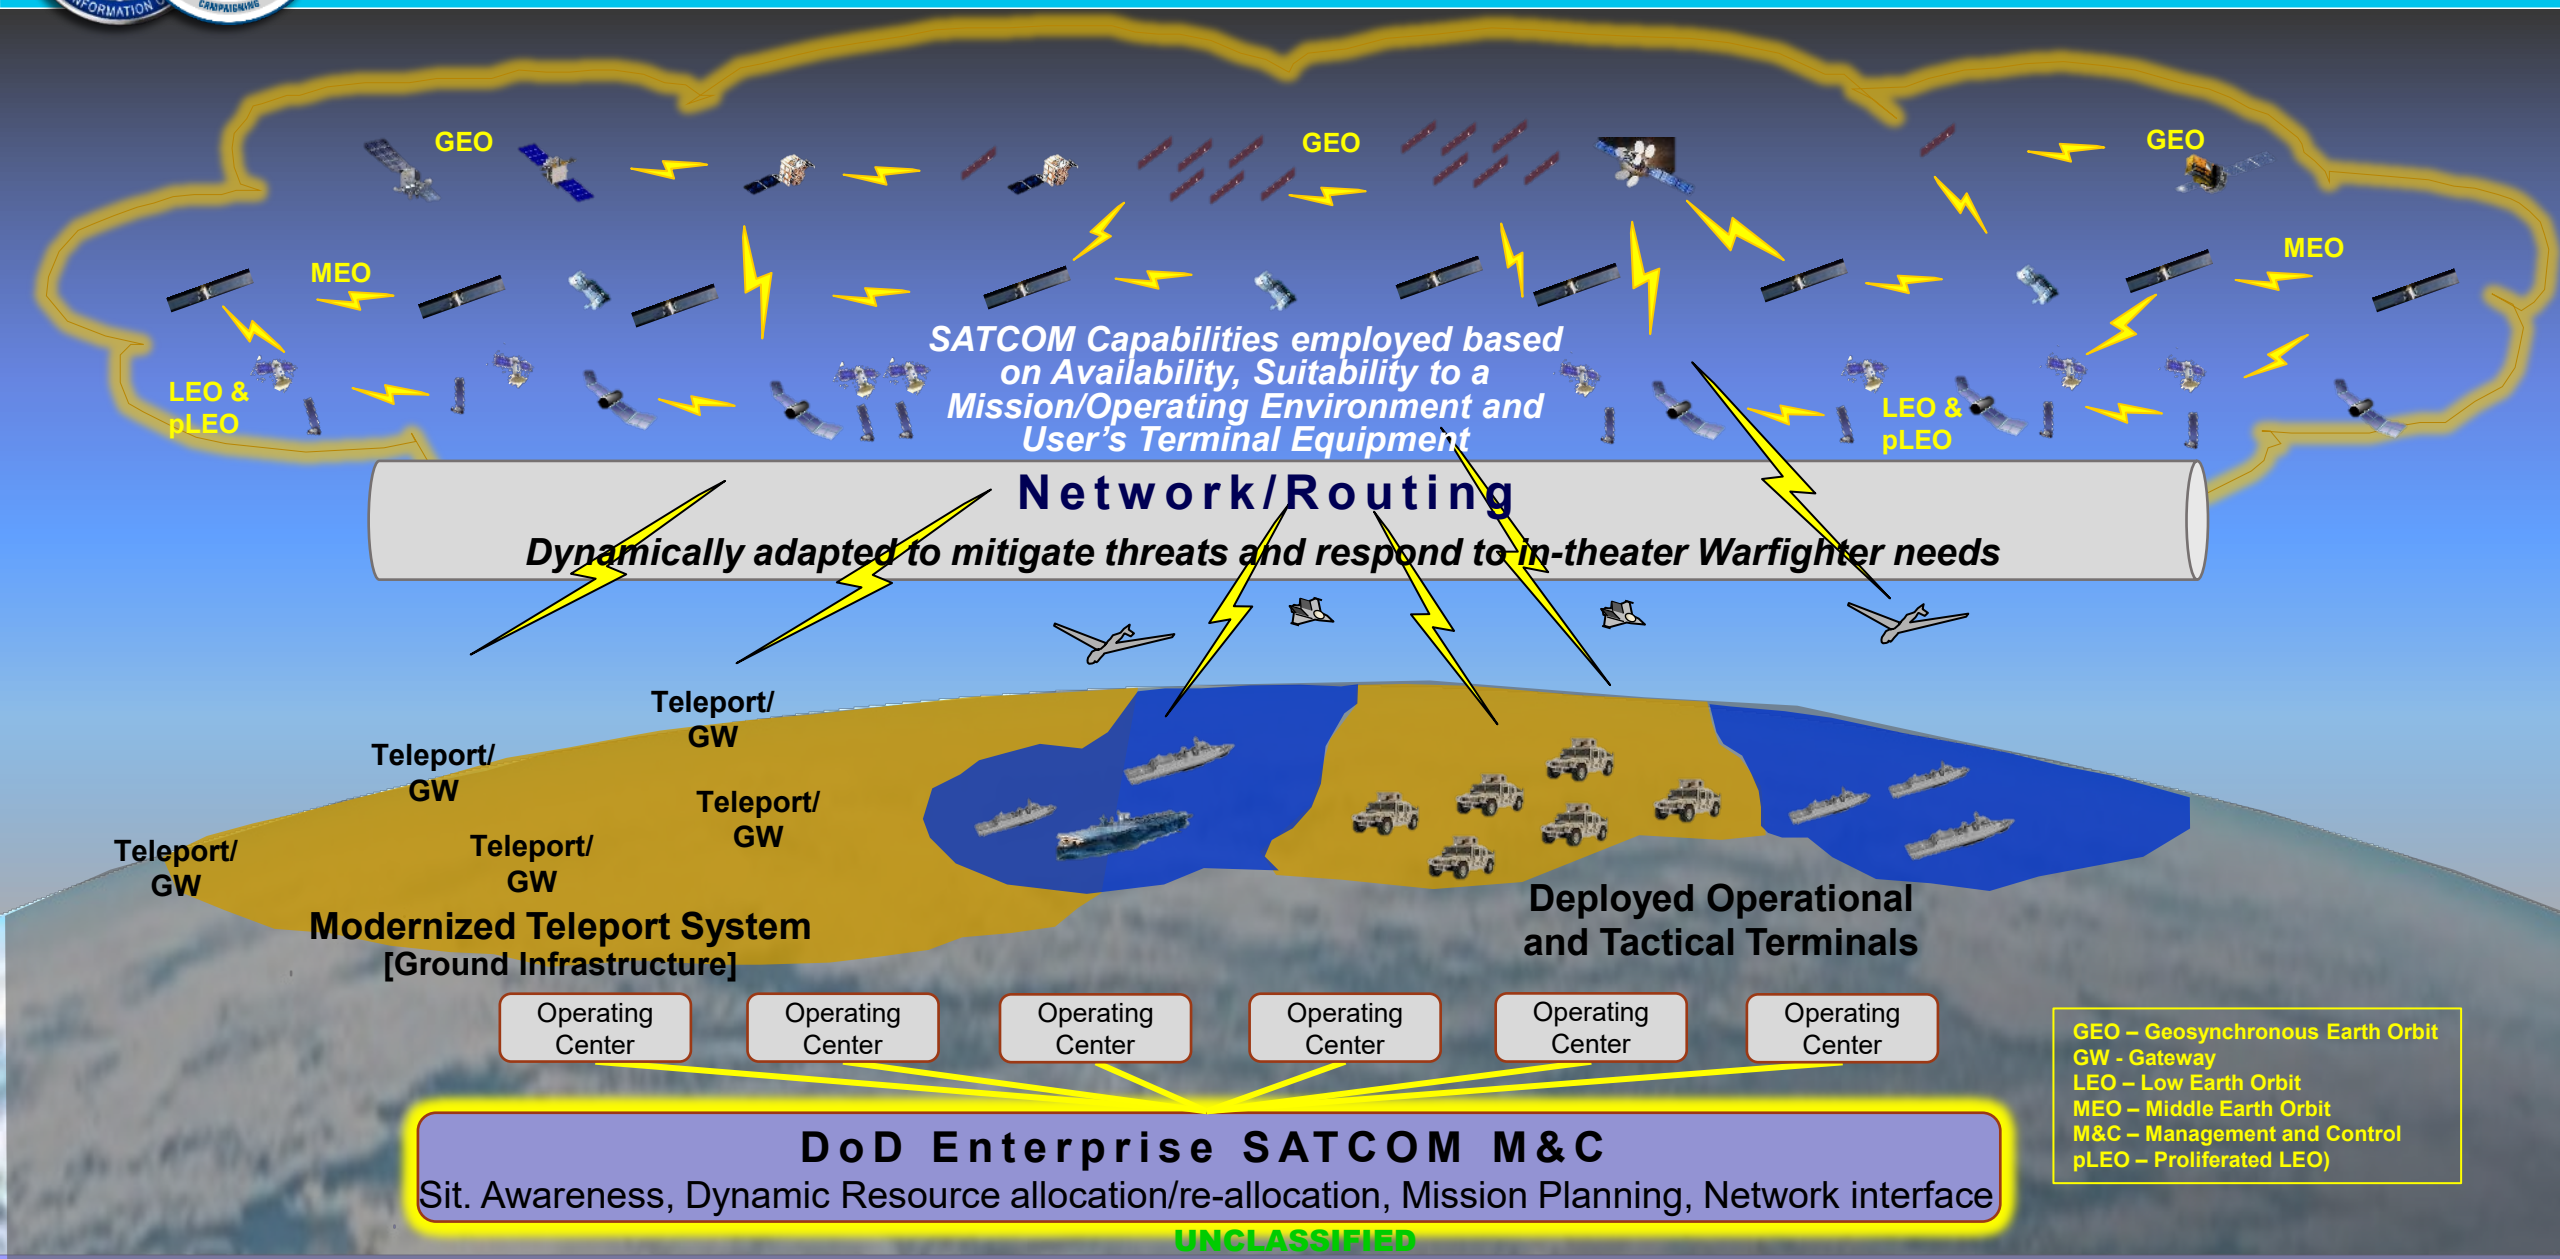

Focused DoD Satellite Communications (DoD SATCOM) Strategy, Governance, and Modernization

Mike Dean, DoD SATCOM Chief
DoD Chief information Officer

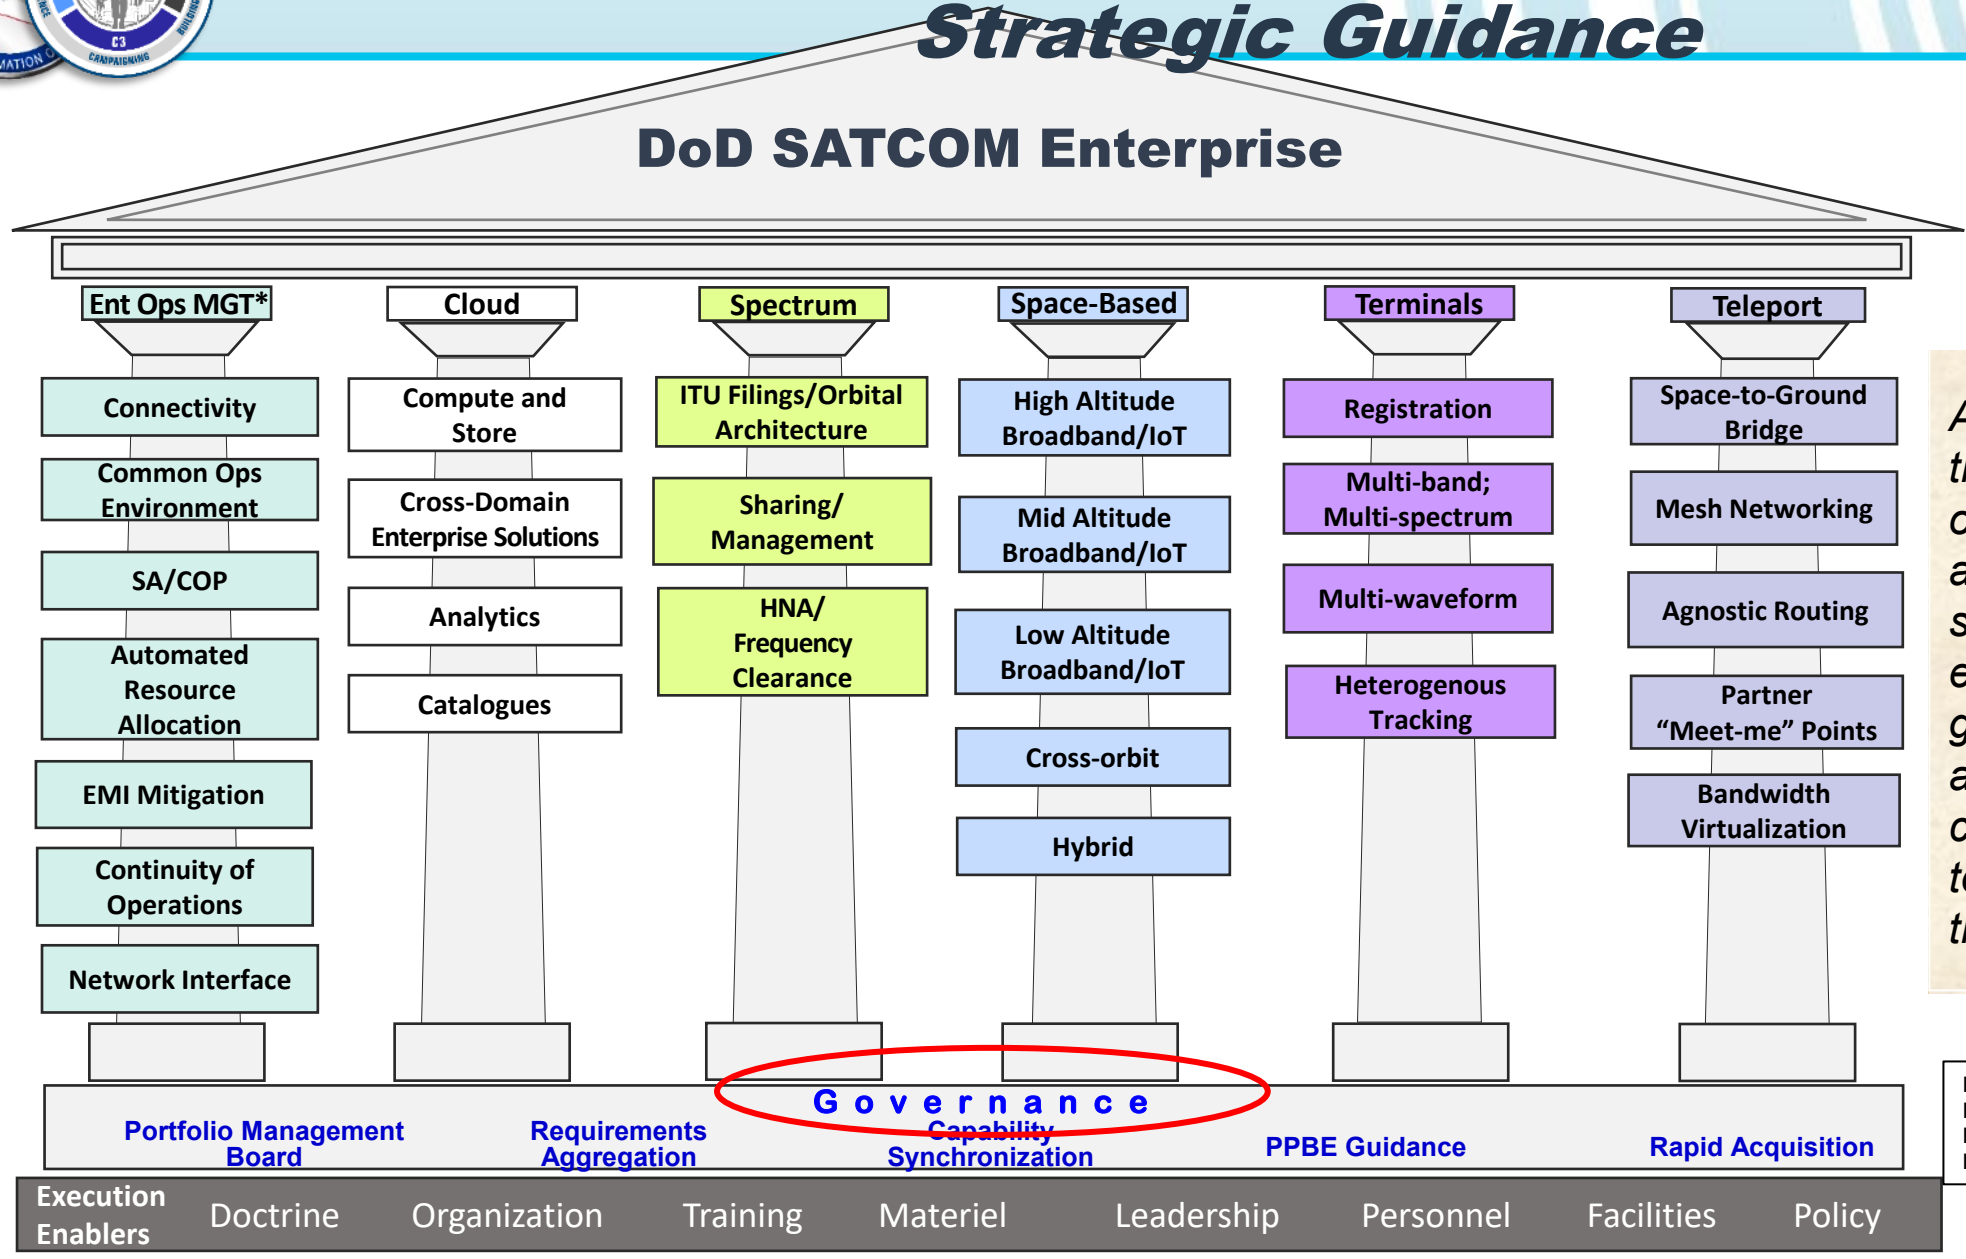

June 2024

UNCLASSIFIED

From MILSATCOM USA '23 - *The Goal*

From MILSATCOM USA '23 - *Aligning Efforts via Strategic Guidance*

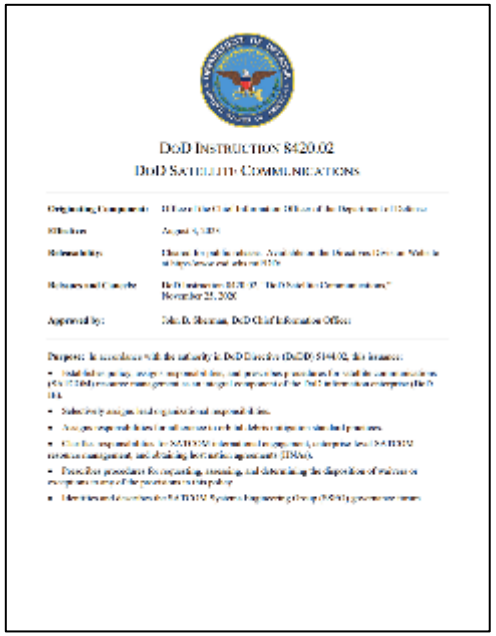

Achieving an enterprise that "…provides an operationally effective, affordable, resilient and secure SATCOM enterprise that supports global mission priorities and is adaptable to rapidly changing requirements, technologies, and threats."

HNA – Host Nation Approval
ESC-MC – Ent. SATCOM MGT & Control
MGT - Management
IoT – Internet of Things

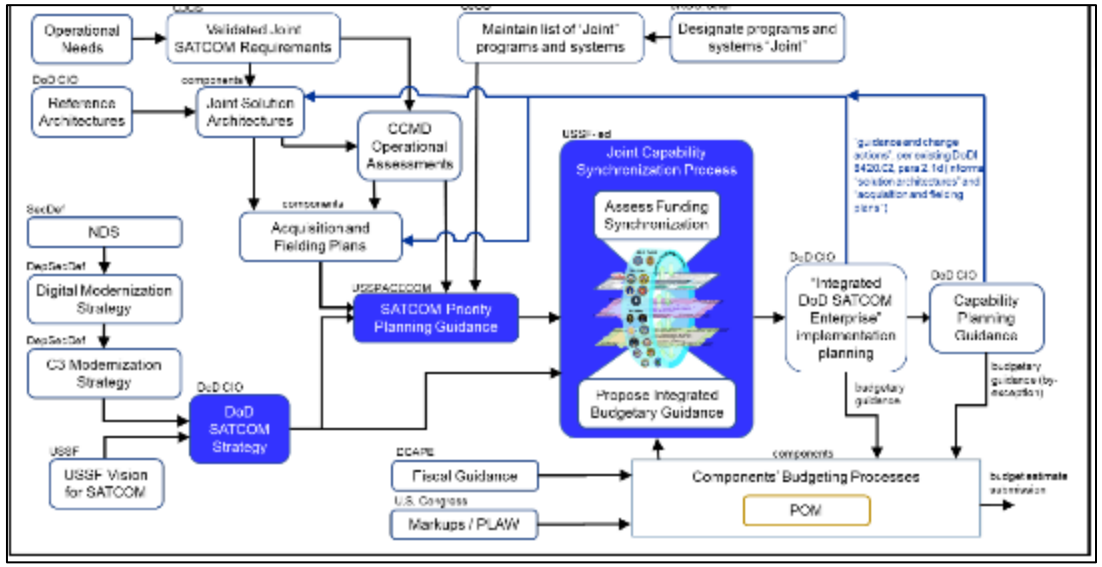

* **Ent Ops MGT** is "Enterprise Operations Management: Capability objectives are drawn from the DoD ESC-MC reference architecture

DoD Instruction 8420.02 "Satellite Communications" Update 3 AUG 2023

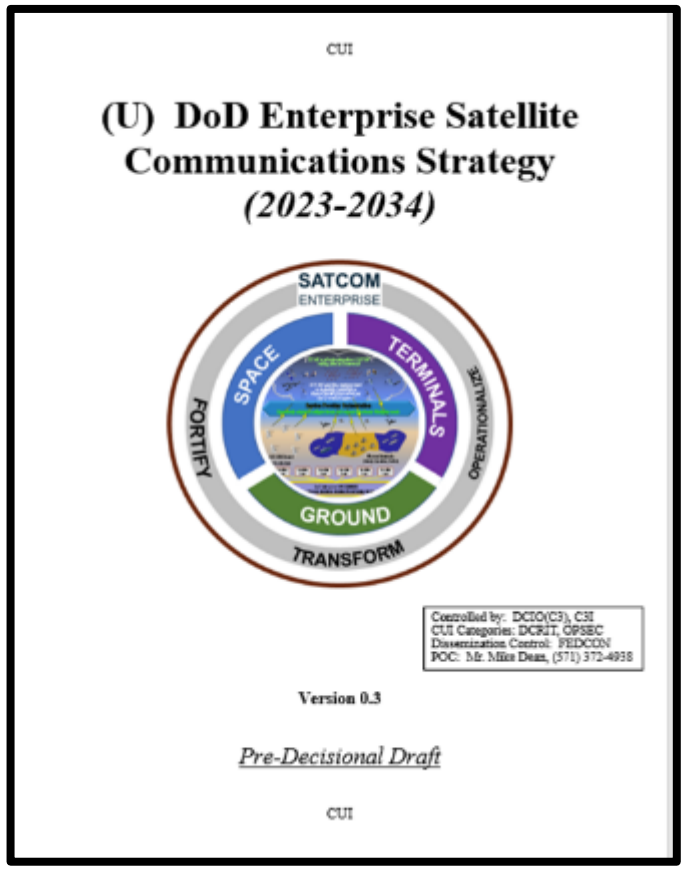

DoD Instruction 8420.02
DoD Satellite Communications

- Recognizes establishment of Space Force and its responsibilities
- Incorporates recommendations from the 2020-21 SATCOM International Engagement WG
- Incorporates recommendation from the 2022 IDSEP Working Group
  - DoD SATCOM Strategy (10-year) & SATCOM Annual Planning Guidance
  - DoD SATCOM synchronization via a rechartered SSEG: the Enterprise Satellite Communications Steering Group (ESC-SG)
  - Clearly defines lead responsibility for most aspects of the DoD's SATCOM Enterprise
    - Requirements
    - Architectures
    - Acquisition
    - Management & Control
    - Spacecraft
    - User Terminals
    - Cybersecurity

The Strategy

DoD Enterprise SATCOM Strategy

CUI

(U) DoD Enterprise Satellite Communications Strategy (2023-2034)

SATCOM ENTERPRISE
SPACE
TERMINALS
GROUND
FORTIFY
OPERATIONALIZE
TRANSFORM

Controlled by: DCIO(C3), CSI
CUI Categories: DCRIT, OPSEC
Dissemination Control: FEDCON
POC: Mr. Miles Dean, (571) 372-4938

Version 0.3

Pre-Decisional Draft

CUI

Strategic Context

Problem: Current enterprise built for the last war:

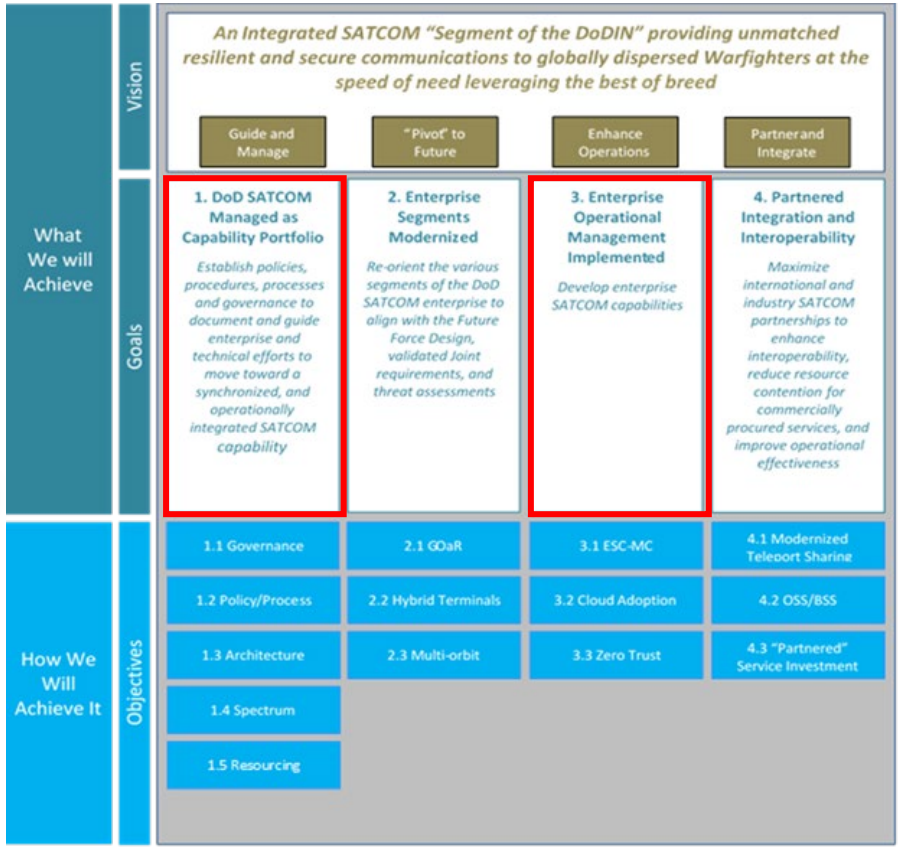

- Assumed space superiority
- Not reflective of new SATCOM order of battle
- Fails to capitalize on next generation technology
- Lacks a lean, modern, sufficient ground (teleport) segment
- Rapidly maturing allied capability / new opportunities

Desired Conditions

An effectively resourced and managed SATCOM segment of the DoDIN providing unmatched, resilient, and secure communications to globally dispersed Warfighters at the speed of need leveraging the best of breed.

OBJs:

- **Reorient and synchronize** the enterprise **for the Force Design**
- **Modernize** all segments…
- Operationalize; enable CJADC2 & Integrated SATCOM Vision
- Focus partnerships to achieve highly-capable, interoperable solutions; reduce "friendly" competition for resources

CJADC2 – Combined Joint All-domain Command and Control

Governance Re-orientation

DoD Enterprise SATCOM Strategy

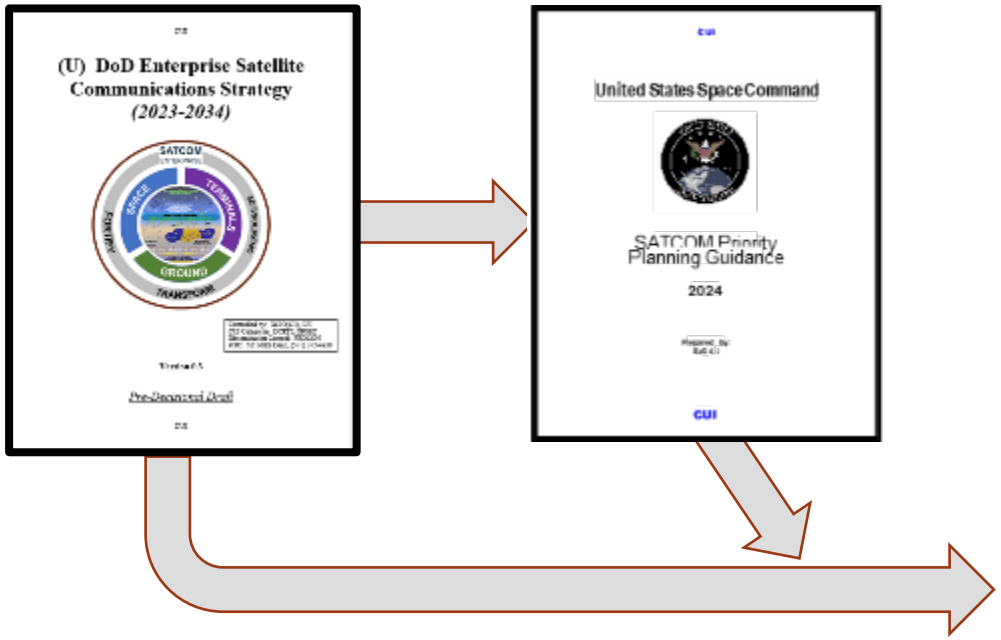

Covers a 10-year period; updated every 2-3 years

(DoD CIO)

SATCOM Priority Planning Guidance

Delivered annually in time to influence PPBE cycle

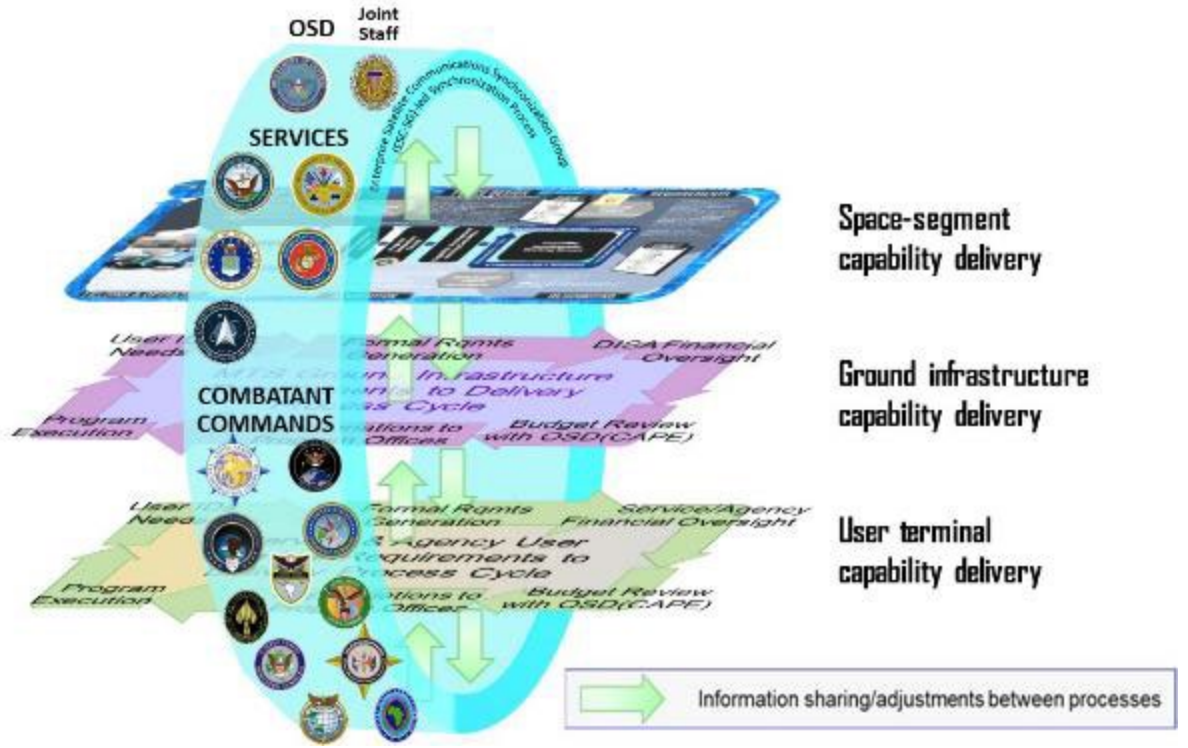

(USSPACECOM)

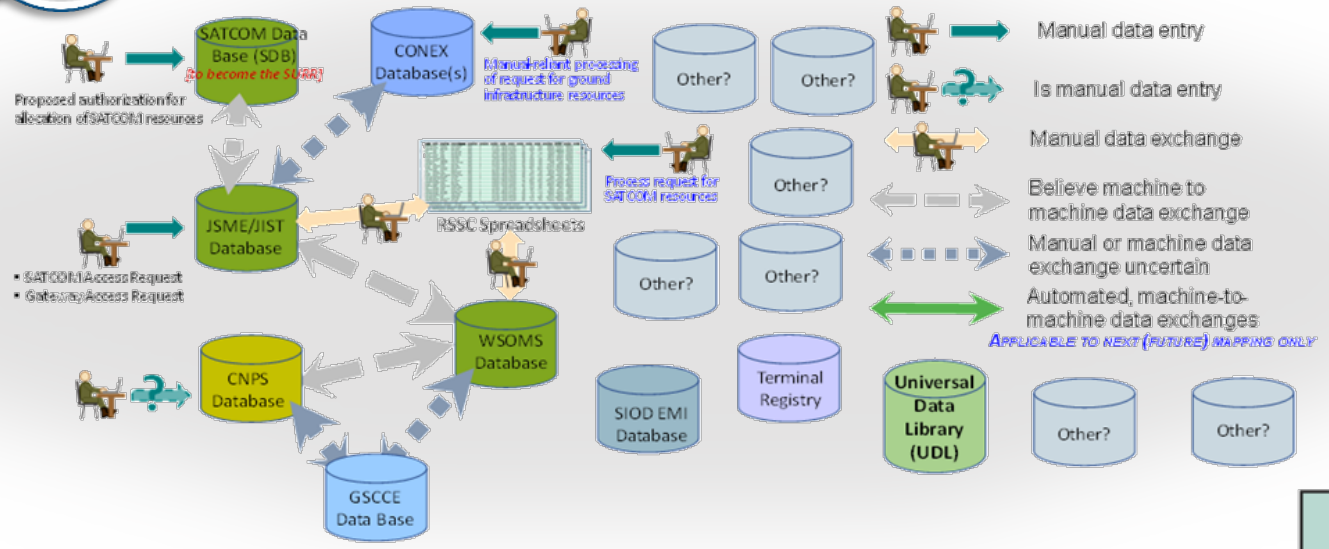

PPBE – Planning, Programming, Budgeting & Execution

Capabilities Synchronization

- Identify, vet, and validate joint SATCOM requirements across the stakeholder community
- Synchronize the delivery of SATCOM capabilities across space, ground (communications anchoring and control), and user terminals
- Identify synchronization issues and coordinate with the appropriate DoD Components to restore synchronization

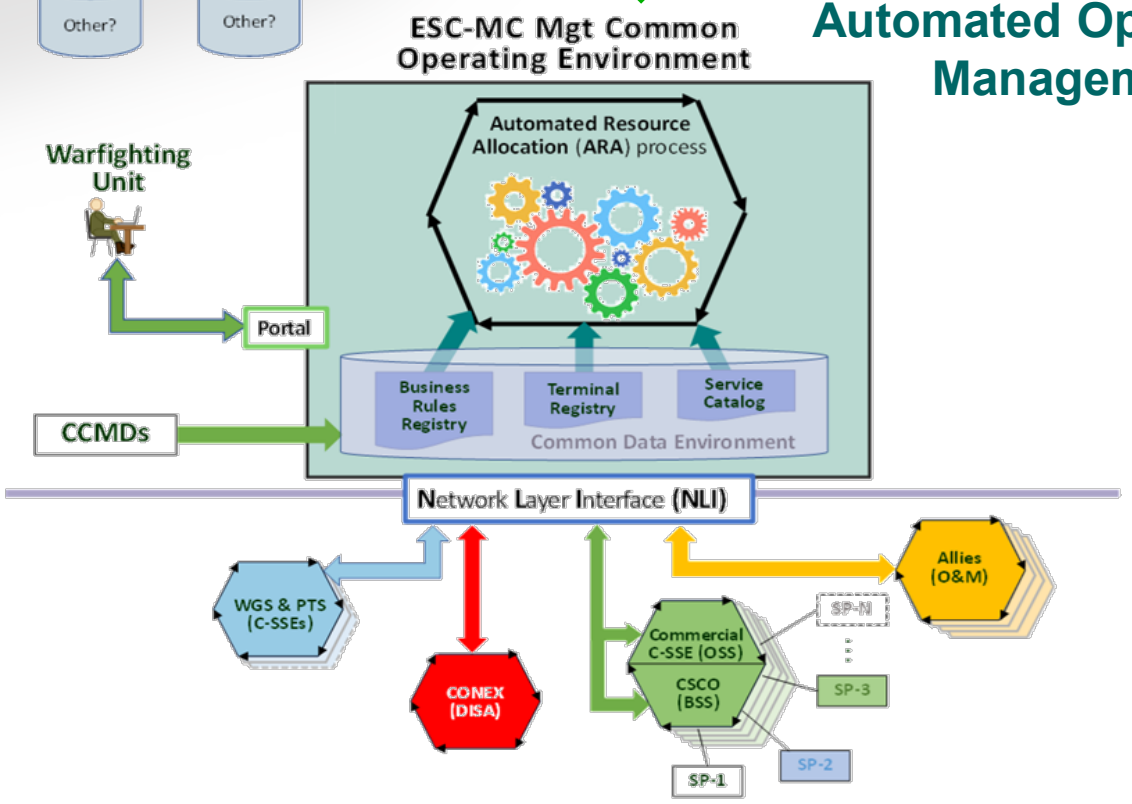

Enterprise Operational Management (slide 1)

Historic / Current Manual Management

THE FUTURE:

ESC-MC Integrated, Automated Operational Management

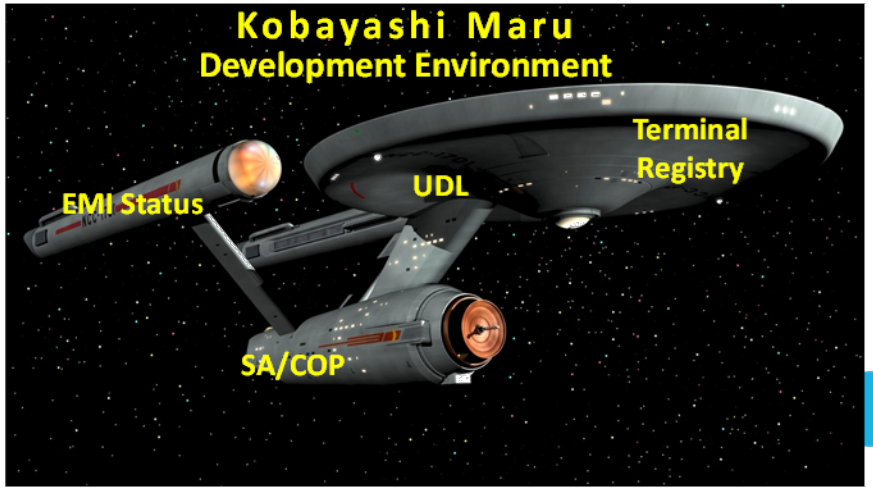

BSS -- Business Support System (BSS)
CSCO -- Commercial SATCOM Contracts Office (CSCO)
C-SSE -- Consolidated - SATCOM Systems Element (C-SSE)
OSS -- Operational Support System (OSS)
PTS -- Protected Tactical System (PTS)
SP -- Service Provider (SP)
UDL -- Universal Data Library
WGS -- Wideband Global SATCOM (WGS)

Military
Commercial
Ground / Teleport
International Partners

Service Providers Element M&C (BSS/OSS) Systems

Enterprise Operational Management (slide 2)

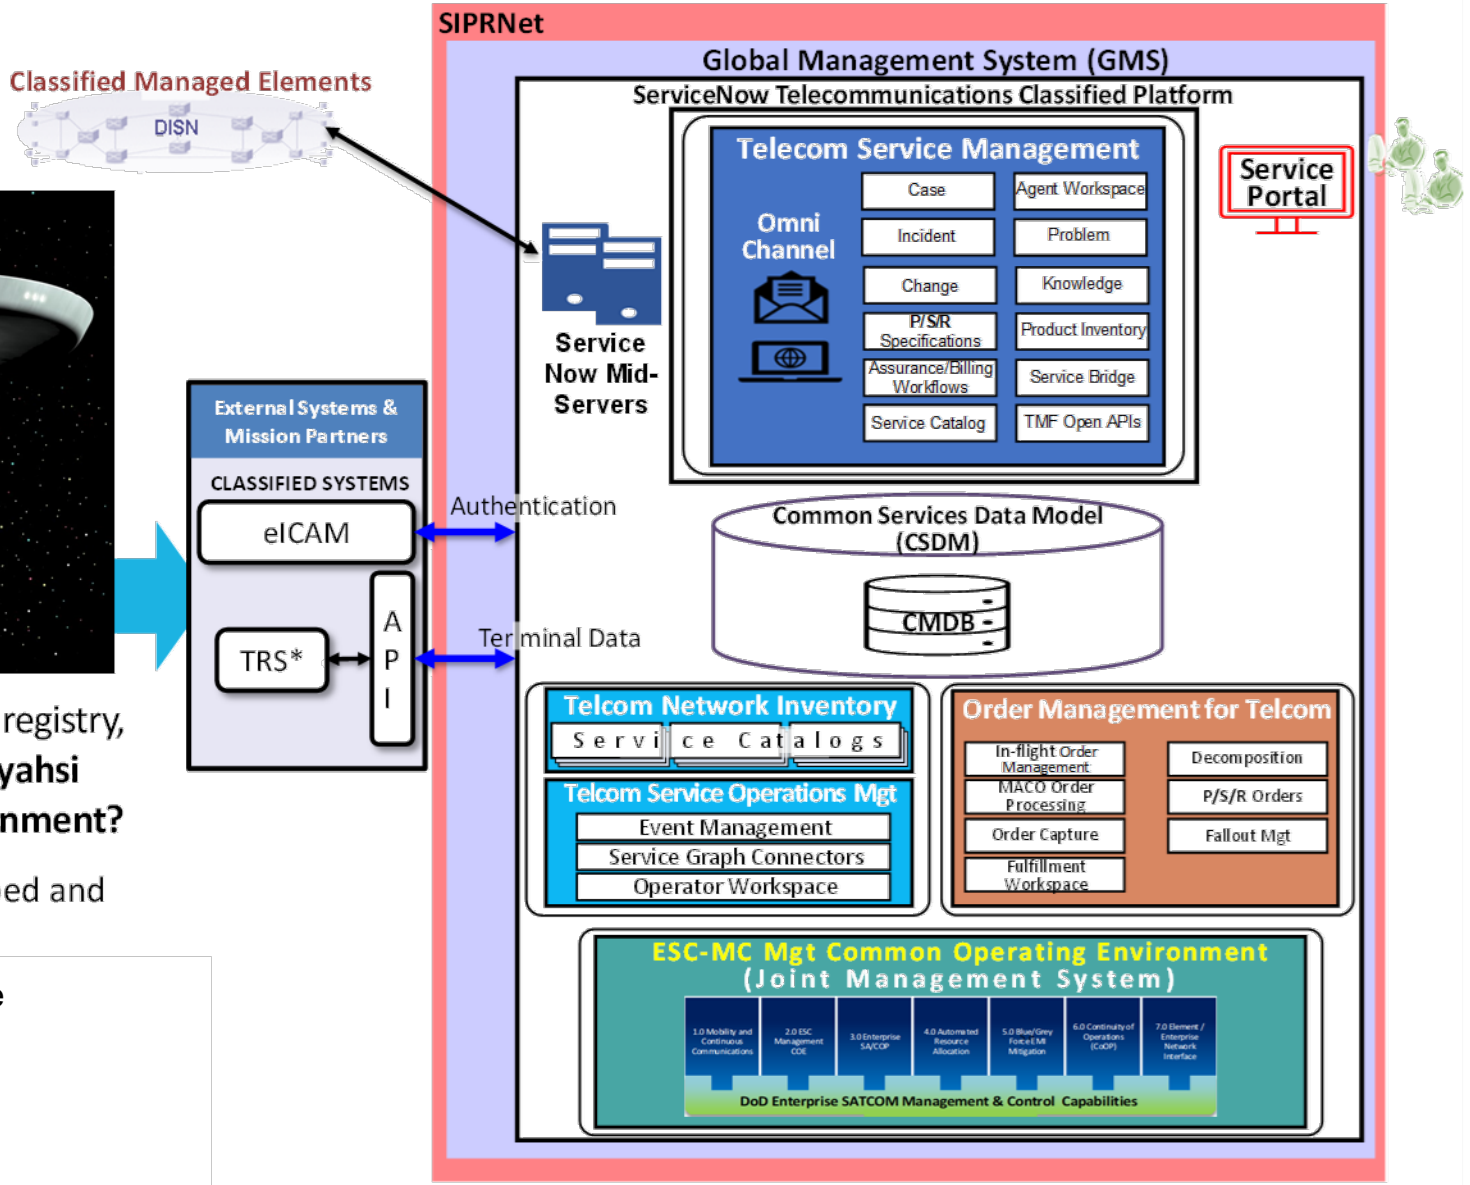

How do developed IT Services (e.g., terminal registry, UDL, SA/COP, etc.) **get transferred from Kobayahsi Maru into the ESC-MC Mgt COE (JMT) Environment?**

- What ESC-MC IT Services are already developed and ready to be hosted?

- How to port those services from USSF to the ESC-MC Management COE?

COE – Common Operational Environment

P/S/R = Product / Service / Resource
